1. Background
2. The Identification Register
3. The Third Party Interface
4. Readiness of the TPI

1. Background

The Registration of Persons Act, 2015

The Registration of Persons Act 2015 established the National Identification and Registration Authority (NIRA) with the mandate to among others allow for access and use of information on the register by Government and private institutions.

Access and Use of information in the Register

Access and use of information on the register is provided for under the Registration of Persons Act 2015 and the Registration of Persons (access and use of information) Regulations 2015.

Requirements for access and use

In accordance with the laws mentioned above, access and use of information is upon:

- Application and payment of prescribe fees under the Registration of Persons(Fees) Regulations 2016.

- Provision of consent of the individual to whom the information relates except where access is required by law i.e by Court Order.

3. The Third Party Interface

4. Readiness of the TPI

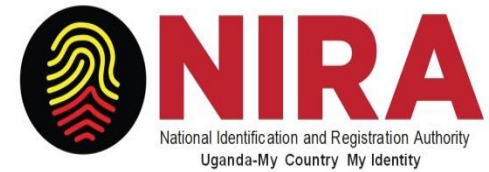

The Interface has been ready for access since November 2017.

a) The Interface has been successfully tested and integrated with the following entities:-

- Uganda Investment Authority** / one stop center for business
- URA** – payment verification and tax payers registration
- UCC and Telecoms** – verification of SIM card applicant data have successfully tested and been integrated.

b) The TPI has a 200,000 records processing capacity daily

5. Requirements for Integration

Entities are required to establish a connection to the NIRA interface using the **credentials** and **Network security settings** to be availed by NIRA upon approval of the application.

The End
